

# ISMS Policy

Trust Sample is committed to maintaining strong information security practices to protect client and respondent data across market research operations, vendor coordination, cloud-based platforms, and data processing activities. We ensure confidentiality, integrity, availability, and compliance with applicable legal, regulatory, and contractual requirements.

## We are committed to ensuring that:

- Applicable statutory, regulatory, and contractual information security requirements are identified and complied with.
- The **confidentiality** of information is protected against unauthorized access, disclosure, or misuse.
- The **integrity** of information is maintained to ensure its accuracy, completeness, and reliability.
- The **availability** of information and systems is maintained to meet business, operational, and client requirements.
- All employees and relevant stakeholders receive appropriate information security awareness and training to enhance competence and accountability.
- An effective information security incident management process is established to ensure that all actual or suspected incidents are promptly reported, investigated, and resolved.
- The Information Security Management System (ISMS) is continually monitored, reviewed, and improved.
- Adequate resources are allocated to implement, operate, maintain, and enhance the effectiveness of the ISMS.
- Information security objectives are established, implemented, and reviewed, considering risk assessment results and business priorities.
